1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert A. Kent on November 16, 2005 wherein it was agreed that the term "polysaccharides" would be deleted from the Markush grouping of independent claims 1 and 24, insofar as the primary reference to Nguyen et al' 195 included a polysaccharide polymer in their cementing slurry. It was further agreed that the species or term "dehydrated salt" in claims 1 and 24 be amended to include the step or limitation provided in Para. [0039] of the specification to clearly recite that such dehydrated salt "will degrade over time as it hydrates" in order to provide the resulting permeable cement.

The application has been amended as follows:

In claim 1, line 7, the term "polysaccharides" has been deleted; and in line 11, after "dehydrated salt", the following recitation has been inserted:

-- which will degrade over time as it hydrates -- .

In claim 24, line 7, the term "polysaccharides" has been deleted; and in line 1, after "dehydrated salt", the following recitation has been inserted:

-- which will degrade over time as it hydrates -- .
